

**University of the Pacific Arthur A. Dugoni School of Dentistry**  
**126th Alumni Association Annual Meeting – 2025 Alumni Weekend**  
Including The 39th Frederick T. West Orthodontics Lectureship and  
The 2nd Alan H. Gluskin Endodontics Symposium

**Stephanie W. Yeung, DDS**

Saturday, February 1, 2025

– 1 CE unit

**Subject Area:** Prosthodontics Scanning

**Title:** "Intraoral and Extraoral Scanning in Implant Prosthodontics: How and Why Things Work"

**Course Description:**

Intraoral scanning is gradually overtaking conventional impressions in many dental clinics, primarily due to perceived convenience and patient comfort. However, it also comes with multiple limitations that cannot be predictably overcome for a myriad of reasons. This discussion will review how intraoral and extraoral scanning data is generated, and its accuracy compared to conventional impression techniques in restorative dentistry, with a focus on dental implant restorations.

**Objectives:**

- 1) Understand intrinsic limitations of three-dimensional scanning technology.
- 2) Explore clinical applications for intraoral scanning.
- 3) Understand different methods of dental scanning, particularly in implant dentistry.

Saturday, February 1, 2025

– 1 CE unit

**Subject Area:** 3D Printing

**Title:** "Additive Manufacturing: Current Capabilities and Shortcomings"

**Course Description:**

Additive manufacturing (3D printing) is becoming increasingly proficient and efficient for dental clinic applications. Manufacturers have made bold claims of being able to replace and optimize many different aspects of conventional dentistry but fail to distinguish hype from reality. The current capabilities and limitations of workflows, resins, and hardware will be addressed with published peer-reviewed research.

**Objectives:**

- 1) Explore different types of dental 3D printing.
- 2) Understand current limitations and applications of 3D printing in dentistry.

**Short Bio:**

Dr. Stephanie Yeung, DDS is a prosthodontist. She earned her certificate in prosthodontics and Doctor of Dental Surgery at the Herman Ostrow School of Dentistry of USC. She is

currently in private practice in Los Angeles, CA and Seattle, WA. Dr. Yeung has lectured internationally and published in peer-reviewed journals on topics within implant dentistry and digital dentistry.
